SRIJAN MUKHERJEE

Engineering Leader Building Scalable Distributed Systems & AI–Powered Platforms

@ srijmukh070@gmail.com +91-8660685187 Bengaluru, KA sinjar666 sinjar666

Engineering leader with close to **14 years** of experience in software development and leadership wearing multiple hats. Proven track record in driving product innovation, optimizing engineering processes, and enhancing team performance. Seeking a Senior Leadership role to leverage expertise in distributed computing, cloud platforms, and AI to deliver impactful solutions and foster a culture of excellence.

EXPERIENCE

Director, Software Development

VISA Cloud Platform

September 2023 – Present Bengaluru, IN

- Established and led multiple high-performing teams with org size of **18 members** (2 Managers + 16 Engineers - 2 scrum teams) with **average tenure of >3 years** and YoY average **retention rate >80%**.
- Portfolio of **18 microservices and frontends and 5 libraries** with an engineer:codebase ratio of 0.78 operating in a lean Gen AI first model delivering year-over-year cost savings of approximately ~**$200M**.
- Fostered **culture of innovation** in my org with 3-4 technical innovations published year on year.
- Uplifted **Generative AI** competency at VISA Bengaluru site level, resulting in a **30% increase in developer productivity** and conversion of multiple POCs to Production in FY 24-25.
- Active **mentor** in VISA Bengaluru Mentorship program coaching on Technology, Architecture as well as Leadership.

Recent Projects:

- Spearheaded the development of multi-tenant **Agentic Workflow Builder** enabling teams to build complex enterprise **workflows using natural language prompts**. Innovative agentic loop aimed at reducing context rot with large conversation histories and large >1M context window models.
- Optimizing **Compute Infrastructure Lifecycle Management Orchestation** to achieve decommissioning SLAs of <6 hours for virtualized assets and sub week SLAs for Physical Hardware.
- Led the design and implementation of a **Active-Active** Message Queue Architecture for a distributed enterprise job execution engine, resulting in a **60% improvement in p95 SLAs** and a **30% reduction in resource utilization** bagging multiple Technical Innovation Publications.
- Innovated application Architecture which is **Active-Active dual region writer** with RDMS based on conflict avoidance strategy for split brain coupled with an in-built Disaster Recovery state machine.
- Launched "vPlay," a cloud-based AI native in-browser IDE aimed at left-shifting developer setup inertia, with projected annual savings exceeding **$1M**.

Senior Engineering Manager

VISA Cloud Platform IaaS

August 2021 – August 2023 Bengaluru, IN

- Led a team of ~11 full-stack engineers driving design and development for **10+ services** automating day-2 lifecycle aspects of cloud infrastructure.
- Delivered **2 new services** in FY 22-23 by repurposing **existing resources**, achieving delivery in early FY-24.
- Boosted adoption of VISA's Cloud Platform's Job Execution Engine by **400%** from FY-21 to FY-23.

PUBLICATIONS

- S. Mukherjee, D. RC, N. Kumar, and A. P, "System and method of locking and ranking the resource for utilization in a distributed scheduling system," other 5048, Apr. 6, 2022. [Online]. Available: https://www.tdcommons.org/dpubs_series/5048.

MOST PROUD OF

Engineering Maturity and Productivity
Achieved >15% developer productivity using AI across multilpe orgs in VISA Bengaluru

Unmatched Manager Effectiveness
Achieved a **100% manager effectiveness score** from FY-23 to FY-26 in Employee Engagement Surveys

Exponential Product Growth
Elevated Job runs from hundreds annually to an astounding **>10M** in FY-23-24 while maintaining YoY churn rate below 1.5%

SKILLS

Engineering Leadership | Team Collaboration | People Management | Project Management | Mentorship | Adaptability | Strategic Thinking | Conflict Resolution

Generative AI | LLM | RAG | Prompt Engineerin | Knowledge graphs

Distributed Computing | NodeJS | Java | Spring | Angular | Linux | Kafka | Multithreading | HTML/CSS | C++ | C# .NET | HTTP/REST | Virtualization | MySQL | MongoDB | ElasticSearch

- Reduced **hotfix frequency by 45%** for critical products, achieving success rates **>98%** and SLA adherence >**>95%**.
- Co-authored **Intellectual Property** with the team.

Staff Full Stack Developer

VISA Cloud Platform IaaS

Jan 2019 – July 2021 Bengaluru, IN

- Key owner of the Core Platform for CloudView, the portal for VISA's infrastructure provisioning and lifecycle management.
- Led VISA's **hybrid cloud** initiative, focusing on **ESB and Enterprise Gateway Automation** and provisioning services.
- Introduced **HTTP/2 'SPDY'** streams and **Server-Sent Events** as alternatives to REST, driving server-side implementation.
- Mentored junior team members in enterprise coding practices and software architecture.

Senior SW Developer

VISA Cloud Platform UI

Feb 2017 – Jan 2019 Bengaluru, IN

- Developed essential features for **self-service** capabilities in cloud provisioning, focusing on **Kubernetes Container Orchestration**.
- Led UI development across components, ensuring a cohesive user experience.
- Enforced enterprise design patterns in UI development, including **Redux** and **RxJS**, promoting testable components.
- Designed an enterprise rapid application framework using Node.js, Express, and TypeScript, accelerating API development.
- Created an in-house **SPA agnostic micro-frontend framework** for internal app contributions.
- Established scalable **build and deploy strategies** for Node.js applications.

Project Trainee ... Senior Engineer

Honeywell Technology Solutions

Dec 2012 – Jan 2017 Bengaluru, IN

- Wrote safety and mission critical software for UI and Display Proxy layers of the latest **NG-FMS - Next Gen Flight Management Systems** product line powering cockpits of major aircraft from **Boeing, Airbus, Dassault, and Gulfstream**.
- Developed software tools for productivity and process adherence in **Avionics** Software.
- Ported a legacy model-based development environment for ARINC-661 UI widgets on FMS to the web using AngularJS, Bootstrap, and Ionic.
- Built asynchronous network services in C# .NET for on premise Build Server powering Desktop and Hardware Bench Builds and Test Rigs.
- Developed a **desktop application** for software requirements management and Certification Reports Generation using C# .NET and WPF.

Summer Intern

SRM Research Institute

May 2012 – June 2012 Bengaluru, IN

Individually developed "CLASSICO", an app for online classroom audio/video between rural and urban schools. Python + GTK + GStreamer

Hazelcast | GoLang | Qt | Erlang | Software Design and Architecture

EDUCATION

B. Tech in Computer Science

SRM University

2009 – 2013 Chennai IN

- **"ISBN Keeper"** (**Nokia OVI store**): A tool for tracking books by capturing ISBN barcodes, fetching data from the internet, and saving it.
- **"My Sehat"** (**Nokia OVI store**): An electronic healthcare record app maintaining user health data in a portable format for easy understanding by patients and useful reference for doctors.
